- **Mediascan, Head Office, Tunis** : Re-painting of all indoors walls of the Office.

## OUR JOB : A PASSION

**Quality painting is a very difficult task...** To be a painter is a real work, including expertise and experience. Full attention to details is necessary to get the job well done. We have just that! Plus, we have all the skills and patience to carry on with all our painting missions. Every building site, every office or every house interior, big or small, deserves quality, outdoors or indoors. A building or a house or a factory, no matter how old, may even look as good as new when proper painting application and techniques were made... We are really proud of our work when our clients tell us their satisfaction...

Save money and frustration, deal with the professionals...

For **interior paintings**, most paint and home improvement stores offer a variety of paint brands from which to choose, and it can be a little overwhelming to see row after row of what seems like identical paint cans. If you're not sure which brand of paint is best for your particular application, our Interior Advisor can usually provide some guidance. She can even show you the work, before it is actually done, on a 3D screen... You will discover your home with the new colors on your wall... If your decision was not that good, you can choose whatever other color you want, before the arrival of our painting applicators !

For **bigger building sites**, our specialized advisor will visit the site, inspect the supports to be painted and will come back to you with the right solution, as to the choice of the paint, the application technique and the system.

## UNIQUE GARANTEES

- ▶ Our outstanding workmanship
- ▶ The quality of our products
- ▶ Application and durability performance
- ▶ The respect of our deadlines.
- ▶ Our reliability
- ▶ Our fair pricing.
